Corporate Sponsorship & Collaboration Proposal

HACKSPECTRA 2026 is a flagship National-Level 24-Hour Offline Hackathon designed to assemble the top engineering minds and tech innovators from academic institutions across India. Spearheaded by the Department of Computer Science & Engineering (IoT, Cyber Security including Blockchain Technology) at Yenepoya Institute of Technology, this high-octane technical challenge serves as an incubator for practical technological solutions.

The primary objective of HACKSPECTRA 2026 is to bridge academia and industry by tasking student engineers with solving actual real-world challenges across three pivotal emerging domains:

CYBERSECURITY

Threat Defense & Zero-Trust
Architecture

INTERNET OF THINGS

Smart Embedded Systems & Edge
Computing

BLOCKCHAIN

Decentralized Tech & Smart Contracts

SELECTION MODEL & SCOPE

To maintain high execution rigor and solution quality, HACKSPECTRA 2026 utilizes a multi-tier rigorous filtering model:

- **Open Nationwide Registration:** Initial call for proposals across technical colleges and universities across India.
- **Preliminary Technical Screening:** Rigorous evaluation of ideation, technical architecture, feasibility, and alignment with tracks.
- **Top 20 Finalist Teams:** Only the highest-ranked 20 teams (4 members per team, up to 80 elite participants) are invited to the physical campus for the 24-hour offline build phase.
- **24-Hour Offline Hackathon & Evaluation:** Intensive coding, hardware integration, continuous industry mentorship, and final jury presentations.

An Invitation to Partner

We invite corporate industry leaders, technology firms, cybersecurity startups, and enterprise hardware/software providers to partner with us as strategic sponsors. Your partnership directly engages high-potential engineering talent while positioning your brand at the forefront of technical innovation.

About YIT & Organizing Department

Yenepoya Institute of Technology (YIT)

Yenepoya Institute of Technology (YIT), located in Moodbidri, Karnataka, is a premier engineering institution committed to imparting high-quality technical education, fostering research, and nurturing entrepreneurial innovation. Established under the aegis of the Yenepoya Group, YIT is recognized for its state-of-the-art academic infrastructure, industry-centric curricula, and focus on practical learning.

YIT emphasizes hands-on technical development, regularly organizing national hackathons, technical symposia, research workshops, and industry interaction programs designed to equip students with industry-ready skill sets.

ORGANIZING DEPARTMENT

Department of CSE (IoT, Cyber Security including Blockchain Technology) represents YIT's forward-looking academic division dedicated to advanced technology frontiers. The department specializes in cutting-edge computing paradigms, preparing students for complex engineering challenges in secure, connected, and decentralized infrastructures.

■ Internet of Things (IoT)

Sensor networks, edge computing, smart embedded systems, telemetry protocols, microcontrollers, and cloud-connected hardware integration.

■ Embedded Systems

Real-time operating systems (RTOS), hardware abstraction layers, firmware development, and low-power circuit design.

■ Cybersecurity

Network security, threat defense, cryptography, vulnerability assessment, zero-trust architectures, and secure coding practices.

■ Cloud Technologies & Networks

Cloud telemetry, serverless architectures, microservices, containerization, and enterprise data pipelines.

■ Blockchain Technology

Decentralized ledgers, smart contract development, Web3 systems, cryptographic verification, and DeFi/supply chain platforms.

■ Smart & Decentralized Systems

Automated governance, distributed file systems, autonomous device communication, and intelligent analytics.

"HACKSPECTRA 2026 is envisioned as a premier platform for strengthening meaningful, long-term industry–academia collaboration."

About HACKSPECTRA 2026

HACKSPECTRA 2026 is constructed to push student developers beyond theoretical concepts into high-intensity engineering execution. Over 24 continuous hours, selected student engineers will work in teams under strict deadlines, simulating real corporate engineering sprints.

During the event, participants will:

- Build fully functional hardware/software prototypes from scratch.
 - Solve complex industry-focused problem statements.
 - Work under rigorous time constraints and performance evaluations.
 - Collaborate across hardware, software, and security domains.
- Receive direct guidance from industry technical mentors.
 - Present working solutions and codebases to expert judges.
 - Interact with corporate sponsors and technical recruiters.
 - Explore direct internship and career recruitment pipelines.

THE INNOVATION PIPELINE FLOW

EVENT SPECIFICATION SUMMARY

Event Name	HACKSPECTRA 2026
Format & Duration	National-Level 24-Hour Offline Hackathon
Dates	22–23 September 2026
Venue	IoT Laboratory, IT Department, Yenepoya Institute of Technology
Team Structure	4 Members per Team
Finalist Scope	20 Finalist Teams (Up to 80 Shortlisted Finalist Participants)
Reach	Engineering & Technology Institutions across India

Three Core Technology Tracks

HACKSPECTRA 2026 centers around three key pillars of modern engineering. Sponsors may align with individual tracks or propose custom challenges across these tracks.

TRACK 01 CYBERSECURITY & THREAT DEFENSE

Focuses on building defensive systems, secure communications, automated threat detection, and robust cryptographic architectures.

- Zero-Trust Architecture & Implementation
- Network Defense & Packet Inspection
- Automated Threat Intelligence & SIEM
- Applied Cryptography & Privacy Tools
- Application Security & Code Audit Tools
- Real-Time Security Monitoring Dashboards
- Privacy Protection & Anonymity Networks
- Incident Response & Forensics Automation

TRACK 02 IoT & SMART EMBEDDED SYSTEMS

Integrates physical sensors, microcontrollers (ESP32/STM32/Raspberry Pi), edge nodes, and cloud telemetry systems.

- Smart Cities & Infrastructure Monitoring
- Industrial IoT (IIoT) & Predictive Maintenance
- Edge Computing & On-Device ML (TinyML)
- Wireless Sensor Networks & Mesh Telemetry
- Connected Healthcare & Biomedical Monitoring
- Smart Agriculture & Environmental Sensors
- Embedded Hardware Security & Firmware
- Autonomous Smart Embedded Systems

TRACK 03 BLOCKCHAIN & DECENTRALIZED TECHNOLOGY

Leverages decentralized consensus, smart contracts, Web3 protocols, and immutable data ledgers.

- Smart Contract Architecture & Security Audit
- Web3 Decentralized Applications (dApps)
- DeFi Protocols & Cryptographic Settlement
- Transparent Supply Chain Tracking Ledgers
- Self-Sovereign Digital Identity (SSI)
- Secure Distributed Transaction Networks
- Decentralized Data Storage & IPFS Protocols
- Cross-Chain Interoperability Frameworks

Partner With HACKSPECTRA 2026

We recognize that modern corporate engagement extends beyond conventional financial support. Corporate partners can engage through multiple strategic collaboration avenues tailored to company objectives:

1. Financial Sponsor

Directly support event execution, infrastructure, participant prize pools, and hospitality logistics.

2. Technology Sponsor

Provide software licenses, cloud computing credits, hardware development boards, or API access to participants.

3. Problem Statement Partner

Provide custom corporate problem statements based on actual internal product engineering challenges.

4. Judging Partner

Nominate senior technical leaders, engineering managers, or architects to judge final project presentations.

5. Mentorship Partner

Provide technical mentors who interact with finalist teams during the 24-hour build phase.

6. Internship Partner

Identify and shortlist high-performing participants for company internship or pre-placement interviews.

7. Knowledge Partner

Conduct specialized technical keynotes, workshops, or developer sessions prior to or during the hackathon.

8. Prize Partner

Sponsor specialized track awards, best domain prototype awards, or track-specific cash prizes.

9. Swag Partner

Provide branded developer merchandise, t-shirts, hardware kits, or participant welcome kits.

10. Recruitment Partner

Gain access to participant resumes, code repositories, and candidate performance evaluations.

Bring Your Challenge & Observe Talent

1. Bring Your Real-World Problem Statement

HACKSPECTRA 2026 allows corporate partners to introduce custom problem statements representing real operational or engineering challenges faced by your firm. Student teams will directly apply their technical skills to build functional POCs (Proof of Concepts) using your preferred tools, frameworks, or APIs.

Eligible Corporate Challenge Domains:

- Cybersecurity & SIEM
- Software & Cloud SaaS
- Industrial IoT & Automation
- FinTech & Decentralized Pay
- Healthcare Tech & Wearables
- AI/ML & Data Security
- Web3 & Enterprise Smart Contracts
- Embedded Firmware & Hardware
- Enterprise Mobile/Web Apps

2. Observe Talent in Action (Live Talent Pipeline)

Traditional technical hiring relies on short interviews and static resumes. At HACKSPECTRA 2026, your talent acquisition and engineering leadership can directly observe candidates solving complex technical problems over 24 continuous hours.

Evaluate Candidates On:

- **Real-time Coding & Architecture:** Code cleanliness, stack selection, and hardware assembly.
- **Teamwork & Communication:** Collaboration, role division, and presentation effectiveness.
- **Problem-Solving under Pressure:** Adaptability during technical roadblocks and debugging.
- **Execution Speed:** Turning an abstract idea into a working product within 24 hours.

Talent Pipeline Avenues: Internships | Project Opportunities | Mentorship | Pre-Placement Interactions | Future Hiring

* Note: Internships and recruitment selections remain subject to the company's internal eligibility criteria and recruitment processes.

SPONSORSHIP TIERS

Corporate Sponsorship Packages

We offer structured sponsorship tiers designed to provide maximum brand exposure, talent engagement, and corporate alignment. Custom packages can also be structured upon request.

PARTNERSHIP BENEFITS	TITLE ₹40,000+	GOLD ₹25,000+	SILVER ₹15,000+	ASSOCIATE ₹10,000+
Event Title Branding ("Powered By")	✓	—	—	—
Logo on Official Posters & Backdrop	Prime Size	Large	Medium	Standard
Website & Digital Event Page Recognition	Featured	High	Standard	Logo
Dedicated Venue Banners & Branding Stalls	3 Banners	2 Banners	1 Banner	—
Social Media Spotlight Posts	4 Dedicated	2 Dedicated	1 Post	Group Post
Opening & Closing Ceremony Recognition	Keynote Address	Special Mention	Mention	Mention
Introduce Corporate Challenge / Track	Exclusive Track	Optional	—	—
Nominate Industry Judges / Mentors	2 Judges + Mentors	1 Judge + Mentor	1 Mentor	—
Technical Keynote / Interaction Session	20 Mins Session	10 Mins Session	—	—
Direct Access to Talent Resumes & Portfolios	Full Database	Shortlisted DB	Top 20 Teams	—
Promotional Material Distribution in Swag Bag	✓	✓	✓	✓
Official Corporate Sponsor Memento & Certificate	Plaque & Cert	Plaque & Cert	Certificate	Certificate

* Specific branding slots, speaker session timing, and interaction schedules are subject to mutual coordination and event timeline requirements.

Beyond Financial Sponsorship

In addition to cash sponsorship, companies can support HACKSPECTRA 2026 through high-impact in-kind technological resources that directly enhance student prototype capabilities.

In-Kind Technological Support

- **Cloud Credits:** AWS, Azure, GCP, or DigitalOcean cloud infrastructure credits for prototype hosting.
- **Developer Software & Licenses:** Access to security scanning tools, API credits, or IDE licenses.
- **Hardware & IoT Kits:** Microcontroller boards (ESP32, STM32, Raspberry Pi), sensor modules, and communication modules.
- **Cybersecurity Tools:** Test environment licenses, VPN credits, or threat intelligence platform access.
- **Participant Swag & Merch:** Branded t-shirts, hoodies, backpacks, or stickers for 80 finalist participants.
- **Certificates & Trophies:** Sponsoring physical trophies, certificates, or winner gift hampers.

Industry Leadership Roles

1. Industry Judges

Evaluate participant projects during the final evaluation round based on:

- Innovation & Originality
- Technical Architecture & Code Quality
- Practical Problem Relevance
- Scalability & Commercial Feasibility
- Final Pitch & Presentation Clarity

2. Industry Mentors

Guide developer teams during the 24-hour build window by providing:

- Architecture & Code Guidance
- Debugging & Troubleshooting Assistance
- Domain Expertise & Product Feedback

24-Hour Hackathon Flow & Impact

DAY 1 — 22 SEPTEMBER 2026

- 09:00 AM – 10:00 AM**
Participant Check-in & Registration
Verification, badging, swag distribution.
- 10:00 AM – 11:00 AM**
Inauguration & Corporate Briefing
Keynotes by chief guest and sponsors.
- 11:00 AM**
HACKATHON COMMENCES
Clock starts. Problem statement activation.
- 02:00 PM – 05:00 PM**
Mentorship Round 01
Industry mentors review team architectures.
- 09:00 PM – 11:00 PM**
Mid-Way Technical Evaluation
Progress checkpoints and code review.

DAY 2 — 23 SEPTEMBER 2026

- 02:00 AM – 04:00 AM**
Midnight Mentorship & Debugging
Overnight technical support for edge builds.
- 09:00 AM**
Final Code & Repo Submission
Hacking stops. Codebases frozen on GitHub.
- 09:30 AM – 12:30 PM**
Grand Jury Evaluation & Pitches
Live prototype demos to industry judges.
- 01:30 PM – 03:00 PM**
Valedictory & Prize Distribution
Winner announcements and sponsor honors.

EXPECTED EVENT IMPACT

Student Innovation

Fostering rapid prototyping and practical engineering execution.

Industry Exposure

Connecting top talent with active corporate leaders and mentors.

Career Pipelines

Direct identification for future internships and recruitment.

Event Budget & Strategic Value

HACKSPECTRA 2026 operates on a strictly audited transparent event budget designed to deliver maximal technical value, participant hospitality, and smooth execution.

Estimated Expenditure	Expected Revenue & Deficit
1st Winner Prize Pool₹30,000	Internal / Expected Support₹30,000
2nd Runner-up Prize Pool₹20,000	Nominal Team Registration Fees₹12,000
Logistics & Operational Infrastructure₹3,000	Total Expected Internal Revenue₹42,000
External Judges Honorarium & Travel₹4,000	Remaining Financial Requirement₹56,000
Refreshments, Meals & 24H Hospitality (80 Pax)₹38,000	The organizing committee proposes to seek corporate sponsorship support of up to ₹80,000, enabling the event to strengthen prize support, participant experience, technical infrastructure, industry engagement, and overall execution.
Stationery, Banners, Badges & Misc₹3,000	
Total Estimated Expenditure₹98,000	

Let's Build the Future Together

"HACKSPECTRA 2026 is more than a competition. It is a strategic platform connecting engineering students, educators, corporate innovators, and industry leaders around emerging technologies and real-world problem solving."

Why Partner With HACKSPECTRA 2026?

- **Brand Visibility:** High-impact exposure across engineering institutions.
- **Industry Engagement:** Position your leaders as judges and technical mentors.
- **Internship Pipeline:** Identify candidate talent ahead of market recruitment.
- **Talent Access:** Direct pre-screened access to top technical performers.
- **POC Development:** Get solutions to actual corporate technical challenges.
- **Academic Partnership:** Build lasting research & academic relationships with YIT.

LET US BUILD. | LET US INNOVATE. | LET US SOLVE.

HACKSPECTRA 2026 — 24 Hours. Real Problems. Innovative Solutions.
